

## Sun Ridge Systems, Inc.

### Full Stack Web Developer

As a Full Stack Web Developer, you will report to the Chief Technology Officer. Your duties will include:

- Analyze, design, develop, and maintain responsive front-end web applications for company commercial products and internally developed applications.
- Communicate directly with customers to understand requirements and generate functional specifications.
- Independently design and participate with others in design reviews for new features and application functionality.
- Develop, implement, and optimize Microsoft .Net Core Web API libraries to support web and mobile applications.
- Work with existing and new systems/programs as needed.
- Independently analyze, solve, and correct issues in real time, providing problem resolution end-to-end.
- Provide technical support to users and employees. Share expertise, providing technical mentorship and cross-training to peers and team members.
- Prepare written documentation and instructions for users and employees when needed.
- Review and coordinate with CTO all systems changes and programs prior to their implementation.
- Speak and present in front of a large group for training and presentation purposes.
- Complete projects by coordinating resources and timetables with CTO and users.
